

INSTALLATION INSTRUCTIONS

STEPS:

1. Determine type of fasteners desired to secure light bracket to the mounting surface.
(Bracket mounting screws are not included)
2. Place light against surface.
3. Mark area where 2 screws and 1 set of wires will be drilled. Make sure there is no obstructions.
4. Use appropriate drill bit size to drill the 3 holes and file or deburr holes.
5. Mount license plate onto bracket as shown and place light onto surface with wires inside the intended hole.
6. Screw the bracket into the designated screw holes and connect wires to the power source.
7. Test the function of the light to confirm light is working properly.
