The **M09410 Series** is a new low profile grommet mount light that fits in a small 3/4" hole for mounting. With 6 long lasting bright LEDs the Red and Amber colors meet all FMVSS standards for a P2PC combination clearance marker light. Install the included foam gasket with double sided 3M Tape behind the grommet for increased sealing to prevent moisture penetration through the mounting hole.

- Color Retail Packaging
- 6 LEDs
- Polycarbonate Lens & Housing
